DOCUMENT SECURITY ALLIANCE

About DSA

The Document Security Alliance (DSA) was formed through a partnership of technology providers, users, and the United States Secret Service. The government agencies, private industry and academia that make up the DSA work together to provide a forum for the continuous improvement of our nation's most important documents and related security procedures.

What are the Benefits?

- As a member of the DSA, you belong to an elite group of professionals who are focused on making the world a safer place by sharing their expertise on protecting documents and credentials from fraud.
- DSA members represent a broad spectrum of technologies, agencies and industries. You have the opportunity to network and gain valuable contacts across a wide range of specialties and have access to this country's most knowledgeable experts, allowing your organization an opportunity to better understand the challenges and opportunities present within the security industry.
 - Members represent:**
 - major Government agencies involved with secure documents and secure identity programs
 - system integrators
 - secure document and secure card printing companies
 - personalization printer manufacturers
 - security feature technology providers
 - encryption organizations
 - smart card and biometric providers
 - other industry related associations
- As a member, you can take pride in being affiliated with an organization that has high level government support and participation.
- You have the opportunity to address leading-edge security issues your competitors may not yet know about and develop a thorough understanding of the issues that will impact your markets and your company.
- You have the opportunity to collaborate on projects with some of this country's most knowledgeable experts, expand your own expertise, and even share *your* knowledge and skills with industry peers and government agencies.
- Attend member meetings and represent your company's interests within the DSA
- Access to speakers and fellow members whose presentations and expertise may be pertinent to your work.
